

The first choice in maintenance for your grounds

# Introduction

At Tudor Rose Tree Care, we combine an outstanding level of workmanship with the highest standards of customer service. We specialise in bringing a fresh lease of life to your grounds.

We have established ourselves as the leading tree care and tree surgery service in Kent. Our extensive range of services covers everything from crown reduction and thinning through to tree surgery and hedge trimming.

We specialise in monthly maintenance agreements, where the passion of our work shines through with every subsequent visit, leaving you with a site to be proud of.

Tudor Rose are NPTC qualified tree surgeons, receiving full health and safety training and approval, giving you total peace of mind. We understand the inherent risks of our work and take every precaution to ensure the safety of both ourselves and those around us. In the unlikely event of an accident occurring, we are fully covered by our public liability insurance. As fully qualified Arborists, and working alongside a team of health and safety advisors, you can have total peace of mind that we will fell your tree in accordance with the latest official regulations. We are CHAS Accredited Contractors and Safe Contractor Approved.

We believe that how we leave a project is as important as the work we do, so when a job is done, we always ensure you are completely happy with the state of the site.

Tudor Rose prides ourselves on our reputation so we will always go the extra mile the job is completed to the best possible standard; no corners cut and no shortcuts taken.

If you want an experienced Arborist with a passion for excellence then look no further than Tudor Rose.

To find out more about our professional and amazingly affordable tree care services, just give us a call and we will tailor a package to meet all your requirements.

# Services

## Monthly Maintenance

---

Allow us to manage your grounds throughout the year with monthly maintenance. Keep your site safe and looking its best without having to lift a finger. Like anything else, routine maintenance makes a big difference.

## Tree Surveying

---

Land owners have a responsibility to ensure that their property does not pose a risk to others, such as risk of falling branches. A tree survey will highlight which trees may need remedial work to make them safe.

## Tree Felling

---

At Tudor Rose we are experts in tree felling. Tree felling is the process of cutting a tree from the base using wedges to fell the tree in one piece. This is not recommended for trees in confined space, instead, we would use sectional dismantling.

## Tree Topping

---

Tree topping is where whole tops of trees or large branches/trunks are removed from the tops of trees. Tree topping achieves three things: safety, aesthetics, and also stimulates new growth.

## Tree Pollarding

---

Tree pollarding is a pruning system that removes the upper branches to promote a dense head of foliage and branches.

## Crown Reduction

---

Tree crown reduction involves removing the top canopy of the tree. This can serve to allow more light into your garden or property, but is also ideal for reducing the risk of a tree interfering with overhead cables.

## Crown Thinning

---

This involves removing selected branches (dead, weak or overlapping), from the crown of the tree. This improves the overall balance and structure of the tree as well as letting more light through the branches.

## Site Clearance

---

Tudor Rose provides an affordable, reliable clearance service for your grounds, such as removing fallen leaves and other debris.

## Grass Cutting

---

We can maintain your lawns on a regular basis to keep them looking tidy, fresh, and inviting to your visitors.

## Hedge Trimming and Bush Cutting

---

Tudor Rose are experts in keeping your grounds looking their best, and as part of this, we provide our customers with professional hedge trimming services. There's no job too big, and none too small. If you are looking for a professional, affordable hedge trimming service then Tudor Rose are the company for you.

## Grinding

---

This is a very effective method of stump removal. Stump grinders mechanically grind out the main root. Some roots will be left in the ground but most of these will rot down over time. Fine sawdust will be left over from the grinding.

## Excavating

---

This can be done by hand but is usually only carried out with smaller trees. For the larger tree stump, we employ the use of mechanical excavators to help us remove your stump, again leaving a slightly higher stump to assist the excavation.

## Stump Removal

---

Stumps are an important part of the tree removal process. If a stump is left after a tree is felled, it is almost certain to develop fungal root rots and suckering root rots. This can cause extensive damage to the surrounding area. Even if a stump is dead, it can still cause root diseases.

# Frequently Asked Questions

## When should I have my trees pruned?

---

In most cases, trees can be pruned all year round, although it is commonly accepted that winter is the best time as the tree is growing at its slowest so pruning will not affect the tree as much. Don't worry if you are not sure what type of tree you have as Tudor Rose are experts in all things to do with trees.

## What insurance cover and health and safety precautions do you have?

---

At Tudor Rose we are meticulous in ensuring that everything we do is in line with the latest in tree surgery health and safety guidelines. We work alongside a team of health and safety advisors to ensure we keep up to date with new legislation at all times. Method statements and risk assessments are carried out. We have a full public liability insurance that covers us working on jobs of all sizes.

## What responsibility do I have for my trees?

---

If a tree is on your property, it is your responsibility to ensure they are in a safe and healthy condition and pose no danger to people or property in the vicinity. If you are unsure whether or not your trees are safe and healthy, just give us a call and we can come and make an official assessment.

## What areas do you cover?

---

- All contracted works, 4 hour and 24 hour reactive callouts carried out
- All contracted works, 24 hour and ad hoc works carried out
- All contracted, quoted and project works carried out
